

## SOMMAIRE

Experienced software engineer excelling in fast-paced environments and teamwork. Developed over 15 successful projects with a focus on problem-solving. Skilled in JavaScript, Node.js, React.js, and Python. Passionate about tackling web development challenges to enhance user experience.

### EDUCATION

**Bachelor's degrees**

web developer  
2018 – 2022

**1337 Coding School**

software engineer  
2022 – 2024

### SKILLS

Backend development

- laravel
- Firebase
- Inertia.js

Frontend development

- VueJs
- Nextjs
- Tailwind
- React query
- Pinia

Tools Proficiency

- Git
- Docker & Docker compose
- virtualization
- SGBD

### Programming Languages

- javascript
- typeScript
- php
- c
- c++
- Python

### PROFESSIONAL EXPERIENCE

**DDQ-360**

Full stack (Nextjs firebase)

DDQ simplifies the organization of scattered data from emails, tasks, and meetings by centralizing it. With DDQ, all information is in one place, making it simple to find and respond to investor inquiries efficiently

**NextCar**

Full stack (Nextjs)

The project is a SaaS application designed to create invoices for clients purchasing cars from a company. With seamless integration, users can generate invoices efficiently, facilitating smooth transactions between businesses and clients

### ACADEMIC PROJECTS

**ft\_transcendence**

Full stack (Django nextjs)

ft\_transcendence is an ambitious project focused on integrating gaming functionalities with seamless communication and user interaction. Our aim is to establish robust communication channels, streamline friend connections, and ensure secure user authentication.

**ft\_irc**

Backend (C++)

FT\_IRC is a C++ project aimed at developing a concise Internet Relay Chat (IRC) client and server. The project involves implementing both the client-side and server-side components of the IRC protocol, facilitating chat communication between users.

**Cub3D**

Backend C

Cub3d is a C project focused on developing a compact 3D game engine. It entails rendering a 3D maze using raycasting techniques, providing players with an immersive gaming experience
